

WOOD'S DEHUMIDIFIERS RANGE

One of the world's most popular dehumidifiers!

Quality, reliability and energy efficiency for over 60 years!

MADE IN SWEDEN

Wood's[®]
woods.se

Dehumidify now!

Don't worry about unpleasant and damaging humidity in your home - leave it to a dehumidifier to take care of the problem. Your satisfaction is our goal, every time.

Wood's has a wide range of dehumidifiers so regardless of whether you have a large, cold crawl space or a small, warm laundry room, you will find a product that suits your need.

BENEFITS WITH WOOD'S DEHUMIDIFIERS

- Through the heat pump-effect, Wood's humidifier recycle most or all the energy used to dehumidify into heat.
- Wood's dehumidifiers are some of the most energy efficient dehumidifiers on the market (see our best in test section).
- Extracts the most water in litres per kWh.
- Laundry dries faster and to a lower cost compared to other methods.
- With dryer air, insects, bacteria are less likely to develop.
- Dries wood faster for us in fire places.
- Reduces the risk of rust on tools.
- Eliminates unpleasant odour.
- It is more cost-effective to heat the house when the air is dry.
- All Wood's dehumidifiers have a high air flow. It is easier to keep a large basement dry more evenly. It also easier to dry clothes and therefore quicker.
- You can fit a hose for permanent drainage and all our Wood's dehumidifiers.
- Up to 6 years warranty! Read more below.

Possibility of Extended Warranty - See below!

Did you know that you can extend the warranty of many Wood's dehumidifiers? For some models, Wood's offer as much as 6 years warranty if the filter is replaced regularly. Be sure to register your Wood's product to participate in the extended warranty program.

Best in Test!

Wood's recently won both first and second place in Villaliv's big dehumidifier test! Wood's won with the fastest drying time and best energy efficiency. Read more about the test at woods.se

Spaces

Basements

Humidity often appears in basements since the warm air from the floors above it meets the cold air in the basement. The humidity might also penetrate through the walls from the earth surrounding the basement. This might damage the house and result in very costly reparations and sanitation work. To avoid damage, we recommend placing a dehumidifier in the space, which will lower the humidity levels. If you're uncertain of your humidity levels - verify it with Wood's hygrometers, WHG-1.

Laundry room

Drying your laundry with a dehumidifier is quick and efficient - all year around. The moist air is absorbed and dry, warm air is released which dries the laundry and removes excess humidity from the room. The higher the capacity of the dehumidifier, the faster the laundry dries. Laundry dries fast, efficiently and with less wear.

Bathroom

Taking showers and doing laundry generates humidity that can damage our bathrooms. By placing a dehumidifier in the bathroom, if the humidity levels is too high, you will see dark mould growing on the walls the humidity level decreases to a level that keeps your bathroom dry and comfortable.

Crawl spaces

In crawl spaces it is very important to have sufficient air flow. When the air circulates you make sure that the whole area is dehumidified, not just the space close to the dehumidifier. By keeping the relative humidity level at 50% you keep moisture, mould, and other hazards at a safe distance. The water accumulating from condensation goes through a tube straight to the ground. Wood's hygrometer WHG-1 monitors the humidity level in the crawl space for you.

Wood's new product range SW-series Made in Sweden

Production moves home to Sweden!

Now we are meeting future EU rules on environmentally friendly gases. Alongside the production move, that have made about 40 improvements to our Wood's dehumidifiers!

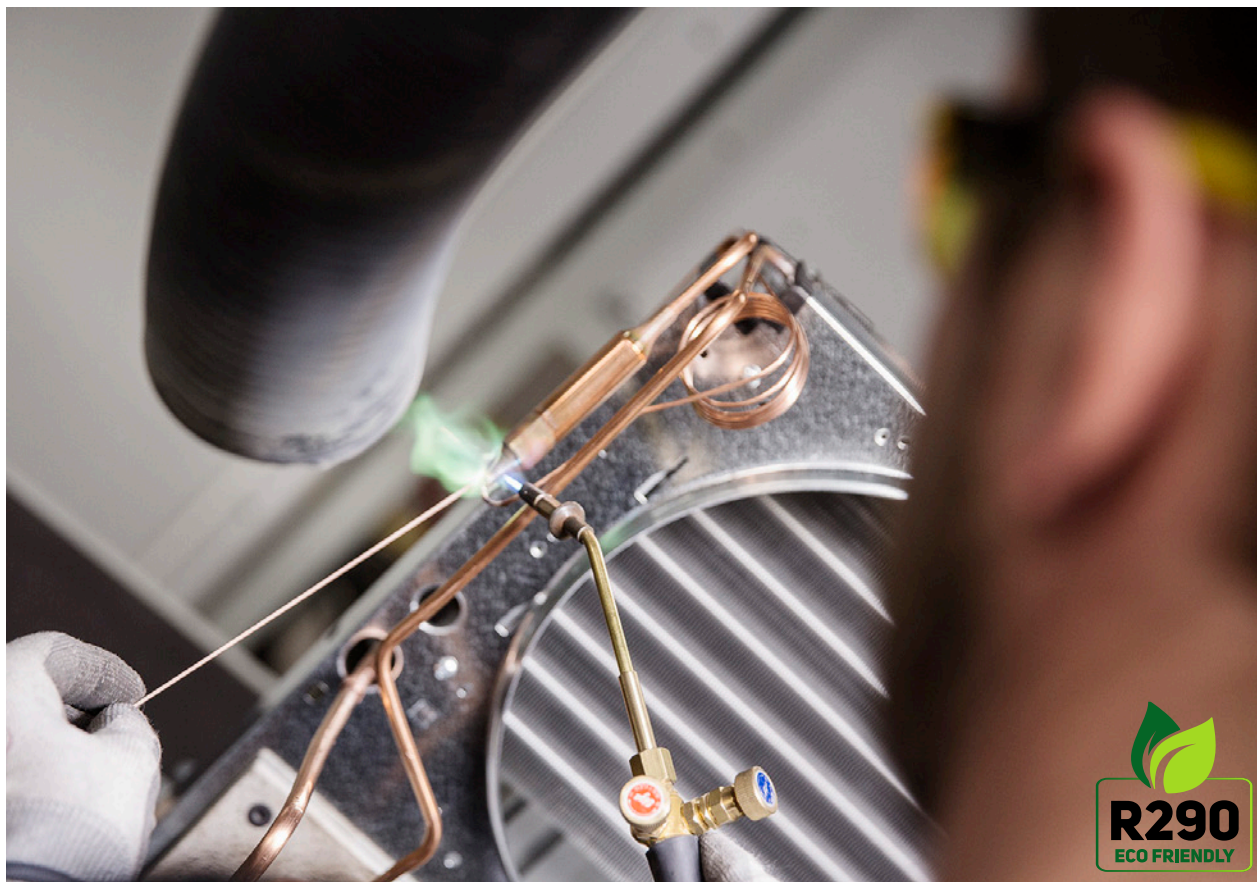

Developed, designed and built in Sweden, with Swedish components for the whole Europe!

The new SW series have been made from our multi test winners background!

With new technology and HFC-free refrigerant we meet EU's forthcoming environmental directive already today.

The Swedish-built SW series is simply more powerful, more efficient, environmentally friendly and more durable than ever before.

Choose me for the basement!

Basement

Moisture arises easily in the basement as the warm air from the outside or from the floor above meets the cold in the basement. This can damage the house and result in costly repairs. In a basement it is important to choose one dehumidifier with a powerful compressor, which does not need to be moved around, and with a strong air flow that can circulate the air throughout the basement, even though it is divided into several rooms. This way, you dry out the entire basement to prevent moisture and mold from growing. Are you unsure if you have moisture problems - check with a Wood's hygrometer.

SW-series - Made in Sweden

SW-serien are available in the following models:

The new SW series have been made from our multi test winners background! The new SW series have been made from our multi test winners background! The Swedish-built SW-series is simply more powerful, efficient, environmentally friendly and more durable than ever before.

With new technology and HFC-free refrigerant, we are meeting the EU's forthcoming environmental directive today. SW has a very good dehumidification capacity down to + 2 ° C and up to + 35 ° C.

Choose the right dehumidifier for your needs

The dehumidifier's function is to absorb moisture in a space and reduce the relative humidity (RH) in the air. The dehumidifier is regulated with a hygrostat and works when the set RH value is exceeded.

i-EcoDefrost

New intelligent defrosting system developed and manufactured in Sweden. It provides better defrost function by adjusting the defrost length to the humidity level and temperature in the room. Dehumidification is faster and more energy efficient.

Energy efficiency

The SW series have been developed to be as energy efficient at the humidity and temperature they are used. R290, I-Eco defrost, low energy fans and efficient compressors make our units very energy

Capacity

We provide a large range of products covering different dehumidification capacity. A higher capacity means that the unit will be able to remove more water in 24h than a lower capacity.

R290 environmentally friendly refrigerant in all SW models.

Choose me for crawl spaces!

Crawl spaces

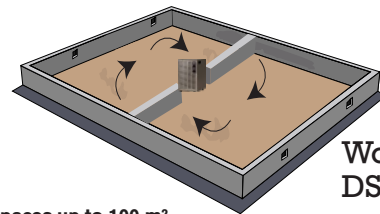

In crawl spaces it is important to have high air flow. When the air circulated ensures that the entire space is dehumidified, not just the dehumidifier's vicinity. Keeping the relative humidity of about 50% keeps you moisture and mold problems at a safe distance. The condensate water from the dehumidifier is easily led into the ground by one garden hose. Verify humidity with a hygrometer, to make sure you avoid moisture and mold problems.

Choose me if this is your crawl space!

The DSC50FM is a powerful dehumidifier designed to dehumidify your crawl space. The DSC50FM has a very high power thanks to the heatpump. It works from + 2 °C and up to + 35 °C. The DSC50FM has a new intelligent defrosting system, i-EcoDefrost, developed and manufactured in Sweden, provides faster and better defrosting and operation, the machine becomes even more efficient, dehumidifies faster and more energy efficiently. The DSC50FM gives you an effective heat pump effect and cleans the air at the same time. The DSC50FM has hose connection for direct drainage to the drain. The DSC50FM is equipped with fixed legs and handles. If the surface is larger than 100 m² then choose a DSC70-ES or DSC90-ES. Read more about DSC70ES and DSC90ES on the next page.

New!

Wood's
DSC50FM

- Optimal for crawl spaces up to 100 m²
- Removes excess moisture and bad odor.
- Gives you a significant heat pump effect, more energy out than in.
- Effective air purification
- i-EcoDefrost, intelligent defrosting system
- Recyclable chassis
- Environmentally friendly refrigerant
- Automatic defrost and mold protection
- Hose Connection
- Robust leg and handle
- 6 year warranty when registration and fulfil the filterprogram requirement

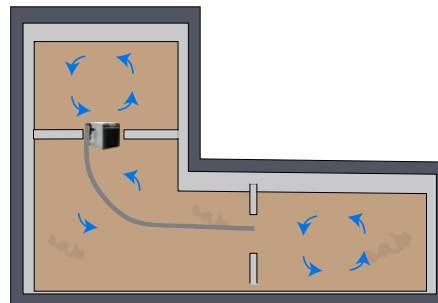

MADE IN SWEDEN 

Choose me if you have an L-shaped crawl space!

Wood's DSC-70ES is a very powerful dehumidifier, with a maximum capacity of 75 liters per day! This makes it possible to dehydrate very large and demanding spaces. It is also particularly suitable for cold spaces, thanks to its high capacity it works down to 0 ° C. Wood's DSC-70ES is easy to adjust and quickly and efficiently reduces the humidity of your crawl space or basement. Connect an air hose to the DSC-70ES and you can circulate the dry air into another room than where the dehumidifier is located. Perfect for split crawl spaces.

- Dehumidifies the crawl spaces, garage and basement.
- Removes excess moisture and bad odor.
- Gives you a significant heat pump effect
- Automatic defrost and mold protection
- High capacity down to 0 ° C
- Can connect air hose
- Works for split crawl spaces

Wood's DSC-70ES

Connect a hose to the DSC-70ES and lead the dry air to split spaces.

INSTALLATION TIP FOR CRAWL SPACE DEHUMIDIFIERS

- 1 Seal the valves to avoid the unnecessarily humid air in the crawl space.
- 2 Place the dehumidifier as central as possible.

- 3 Make a stone curb for drainage.
- 4 Complete with a crawl space-hygrometer to keep an eye on moisture level from above the house.

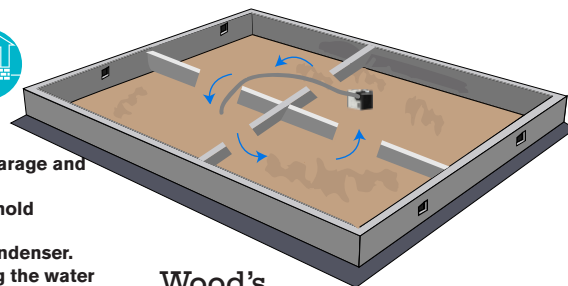

Choose me if you have a large crawl space with multiple rooms!

Wood's DSC-90ES is a very powerful dehumidifier, with a maximum capacity of 95 liters per day! This allows it to dehydrate very large and demanding spaces. It is also particularly suitable for cold spaces thanks to the built-in hot-air freeze, it can handle it down to 0 ° C. This highly powerful Wood's DSC-90ES is easy to adjust and quickly and efficiently reduces the humidity of your crawl spaces or larger spaces.

Wood's DSC-90ES is equipped with a pump for automatic water drainage, perfect when the drain is located a bit away from the dehumidifier. It also means that the dehumidifier does not require any supervision. All you need to do is set the desired humidity, after that, it automatically takes care of itself.

- Dehumidifies the crawl spaces, garage and basement.
- Automatic hot gas freezing and mold protection
- Epoxy painted evaporator and condenser.
- Condensate water pump pumping the water when needed
- Removes excess moisture and bad odor.
- Gives you a significant heat pump effect more energy in than out
- Easy access service hatch for water pump and motherboard, PCB control
- External control panel that can be used to control the machine from other areas.
- High capacity down to 0 ° C
- Connectable air hose
- Works for large crawl spaces

Wood's DSC-90ES

Choose me for laundry rooms!

Laundry rooms

The most important thing with a laundry rooms dehumidifier is the air flow on the top of the dehumidifier, which leaves the laundry dry and reduces the drying time considerably throughout the year. The moist air passes through the machine and and out comes dry and hot air which dries the laundry and removes excess moisture. The higher the capacity of the dehumidifier, the faster the laundry is drying. If the exhaust is located on the top of the dehumidifier, reducing the drying time further. Laundry dries fast, efficiently and with less wear. Not only do you save money but also keep spiders, mold and unpleasant odor away.

Wood's MDK21

Wood's MDK21 is a powerful and compact dehumidifier that fits most environments. The MDK21 exhausts warm, dry air on its top that blow-dries the laundry. With MDK21 you don't have to worry about maintenance or defrosting- merely set desired humidity level and leave the unit to it. 3-year warranty when register your product.

- **Laundry rooms and other small spaces**
- **Air exhaust on the top dries laundry**
- **Easy to use**
- **Energy efficient and quiet**
- **Works only when needed**

Wood's MDK26

The new Wood's MDK26 is a powerful and compact dehumidifier that fits most environments. The MDK26 exhausts warm, dry air on its top that blow-dries the laundry. With MDK26, you don't have to worry about maintenance or defrosting- merely set desired humidity level and leave the unit to it. MDK26 is packed with benefits! 3-year warranty when register your product.

- **Small laundry rooms, basements, living spaces, cabins etc.**
- **Air exhaust on the top dries laundry**
- **Easy to use**
- **Works only when needed**

Wood's WDD80

Wood's WDD80 is a compact and smooth desiccant. The sorption technology allows you to use the dehumidifier in cold areas, such as in the boat during winter storage, or in the vacation home. Wood's WDD80 is energy efficient, reliable and has air exhaust on top for faster drying. 3-year warranty when register your product.

- **Good at low temperatures, suitable for the boat, cabin or caravan**
- **Restart after power failure**
- **Works only when needed**

Keep the moisture level around 50% to avoid moisture- and mold problems. Keep track with Wood's Hygrometers!

Wood's MRD10/14

Wood's MRD10 and MRD14 are very smooth dehumidifiers that fit almost everywhere. They have a handy handle so you can easily move the one you need at the moment, and with the easy-to-use control panel, you easily set the desired humidity. 3-year warranty when register your product.

- **Small laundry rooms with small amounts of laundry.**
- **Laundry rooms and other small spaces**
- **Air exhaust on the top dries laundry**
- **Easy to use**
- **Works only when needed**

Wood's MRD17/20 MRD20 Silent

Wood's MRD17 and MRD20 / Silent are compact and powerful dehumidifiers that fit most of the spaces. They have high capacity, a digital display that shows current humidity and several other smart features and features. 3-year warranty when register your product.

- **Laundry and summer cottages**
- **Air exhaust on the top dries laundry**
- **Washing mode for faster drying**
- **Digital display**
- **Restart after power failure**
- **Works only when needed**

AD20 AD30

Wood's AD Series is a revolutionary news that combines Wood's high demands for efficient and reliable dehumidification, with Wood's unique Swedish filtration system and giving you the best possible indoor air. 6-year warranty when you register your product.

- **Combined dehumidifier & air purifier**
- **Active ION HEPA filter, manufactured in Sweden**
- **Very energy efficient and efficient**
- **Restart after power failure**
- **Air Quality Indicator**
- **Additional effect for washing-drying**
- **Only works if needed**
- **Up to 6 years warranty**

A white, rectangular dehumidifier with a glowing green light on top is positioned on a dark grey tiled floor against a white tiled wall. To the right, there is a patterned curtain and a green plant. The dehumidifier has the brand name 'Wood's' printed on its front. A dark grey semi-transparent box contains text on the right side of the image.

Choose me for the bathroom!

Bathroom

Select a dehumidifier that is adapted to fit your bathroom. Bathrooms are the most affected by moisture in your home. The dehumidifier should be easy to retrieve and restore. Shower and laundry generate a lot of moisture that can damage or lavish your bathroom. By placing a dehumidifier in the bathroom you lower the humidity and get a bathroom that is dry and comfortable. Furthermore, the towels are dried in no time!

Wood's
MRD10

Wood's MRD10 is a very smooth dehumidifier that fits almost everywhere. The dehumidifier have a handy handle so you can easily move it where it's needed at the moment, and with the easy-care control panel simply set the desired humidity. 3-year warranty when register your product.

- Bathrooms and other smaller spaces
- Air exhaust on the top dries laundry
- Easy to use
- Restart after power failure
- Works only when needed

Wood's
MRD14

Wood's MRD14 is a very smooth dehumidifier that takes place almost everywhere. MRD14 has an easy-to-use control panel with 4 preset values that allow you to quickly set the desired humidity. They have a handy handle so you can easily move it where it's needed at the moment. 3-year warranty when register your product.

- Laundry rooms and other smaller spaces
- Air exhaust on the top dries laundry
- Easy to use
- Restart after power failure
- Works only when needed

Wood's
M10 G

Wood's M10 G is a compact and effective dehumidifier with several smart features. The M10 G has a digital control panel and a display showing current humidity. The practical handle makes it easy to move as needed and by connecting a hose, you easily remove condensate water into a drain. 3-year warranty when register your product.

- Bathrooms, summer cottages etc
- Air exhaust on the top dries laundry
- Practical handle
- Digital hygostat
- Works only when needed

Keep the moisture level about 50% to avoid moisture- and mold problems. Keep track of Wood's Hygrometers!

Combined air purifier & dehumidifiers

Wood's AD Series is a revolutionary novelty that combines Wood's high demands for efficient and reliable dehumidification, with Wood's unique Swedish filtration system which provide you with the best indoor air.

Thanks to the patented and Swedish-made Active ION HEPA filter system, you get efficient and energy-efficient air purification - along with reliable and effective protection against moisture and mold damage.

There you will find even more detailed information about wood's dehumidifier!

Garage

Take care of your garage! Select a dehumidifier that is adapted to fit your garage. It should be able to dehumidify even in low temperatures. By placing a dehumidifier in the garage you lower the humidity and get a garage that is dry and comfortable and keep unpleasant odour away.

Accessories for woods dehumidifiers

SMF-filter

Wood's SMF filter comes with all Wood's dehumidifier with an F in the article number. The SMF filter captures mold spores, dust, pollen and other harmful particles. Active ION Hepa filter AD20/30	8012810

To Wood's Hybrid Dehumidifier & Air Purifier!

Active ION HEPA filter

Thanks to Wood's Active ION HEPA filter, Wood's AD20 Hybrid and AD30 Hybrid have very high cleaning capacity and low power consumption. Wood's Active ION HEPA captures air particles using a weak electrical charge, making the filter very effective. Wood's Active ION HEPA filter removes 99.98% of all harmful particles, down to size 0.0003 mm. It is 50 times less than a bacteria.

Replace your Active ION HEPA filter regularly for best power and for 6 year warranty. Read more at woods.se Sign up at warranty-woods.com

New!

Hygrometer

Wood's hygrometers are a given accessory for your Wood's dehumidifier. With a hygrometer, you can easily check the current humidity, and thus detect the moisture problems in time - before causing damage. The hygrometer is also used when installing your dehumidifier; Using the hygrometer, make sure your dehumidifier only works when the humidity exceeds your permitted value.

Wood's has several hygrometers to suit different needs, if you want to use it in the crawl ground, choose a hygrometer with a cord; SS 7,002th Measuring range moisture; 10-99%. Measuring range temperature; -50 ° to + 70 °

New Hygrometer WHG-1 this hygrometer has a display that shows temperatures in both Celsius and Fahrenheit.

Filter AD 20/30- series

**Receive 6 years warranty when registering your dehumidifier and changing filters at least once a year.*

Several million houses have humidity-related damages!

Humidity can create a lot of problems. Often our basements, bathrooms and washrooms have high levels of humidity, thus a peculiar odor occurs. A household of four people generates an average of 12 liters of water from water vapour a day. The humidity creates a perfect environment for rot, mould, mites, spiders and fungi. For the people in the household it becomes especially hazardous

when the humidity level exceeds 50%, which increases the risk of allergies and diseases. For the house the increased humidity might result in a reduced value reparations and sanitation that can be incredible expensive. These problems can effectively be presented before they occur with Wood's dehumidifiers, which decrease the humidity to an appropriate and safe level.

More than 600.000 have chosen Wood's to prevent humidity and mould problems.
